Medical Centre harnasses solar PV at Gloucester Surgery branch

A medical centre in Gloucester have embraced solar whilst looking after the area's patients in the NHS. This new project will provide savings on running costs. These benefits will be used to reduce the cost of using the facilities at the Glevum Way Surgery, providing the best possible energy procurement at minimum cost.

"Working in close collaboration with multiple contractors to deconflict the M&E and ManSafe requirement on a busy roof, along with ensuring the systems meets with the architects approval and specification for the project. YEC were able to understand the operational implications of working around a busy medical centre. This was coupled with a well balanced system to enable PV generation throughout the day when the patients need it most."
Q.S IntoHeat

This local centre can harness the energy making capability of the sun, making a smart business choice and a beacon for sustainability to others in the area. Smart thinking, smart business in this green savy local community healthcare practice.
